

ABS/POS Tester

A new ABS/POS Tester Tool is now available for technicians and customers ([CCP# 145829](#)). The purpose of this tester is to replace the unsupported, older Palm/iPAQ testers that are almost extinct. The tester requires two AA batteries (not included). Detailed instructions are included with the tester, and you can also download them from the Item Details on the Coca-Cola Parts website.

ABS Test Tool Instructions ABS-TOOL-INSTRUCTIONS_V1_2.pdf	2017-03-20 13:12:30

This tester has modern-day technology and can test the ABS/POS communication in two methods.

Basic and Advanced

- **Basic** has four preset items to test. This does not require any other device or app usage. Details are in the instructions.
- **Advanced** has a full spectrum of menus to test via a free Android app using Bluetooth. An IOS version is being developed also.

Note: Per CCNA Service Policies and Procedures, tools such as this tester are not to be charged on service invoices.
